

ALL CLASSES IN THIS DOMAIN
MODEL ARE CONTAINED IN
ca.mcgill.ecse321.cooperator9.model.

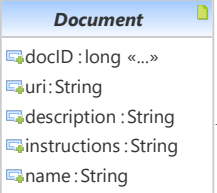

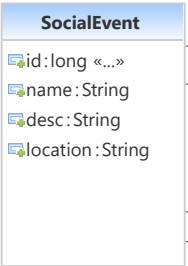

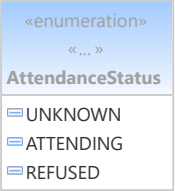

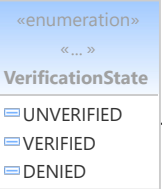

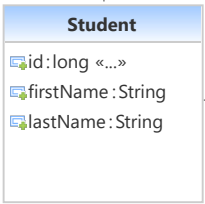

Credentials system to allow for username-
password based login. Every
CoOperatorUser must be instantiated
alongside one, but the CoOperatorUser
cannot have access to LoginCredentials;
merely, a LoginCredentialsRepository will
return a CoOperatorUser when a password
and username match.

Abstract class kept to keep the system open for
an implementation of an administrator-type
CoOperatorUser.

To be a copy of the Student
viewpoint student object.

There is also an attribute called
data, comprising of byte[].
